

Water-Based Silicate Sealer / Densifier

A proprietary, colorless chemical solution that increases the wear surface strength of concrete floors subjected to pedestrian and vehicle traffic. SpecHard-Intraseal penetrates concrete surfaces to seal, densify and harden. SpecHard-Intraseal floors last longer, cost less to maintain, are safe to use, and are guaranteed to resist dusting for years after application.

✓ Benefits

- Reduces porosity and increases hardness of the concrete surface.
- VOC compliant and Non-Yellowing
- Resists staining and penetration of oil and many chemicals
- Minimizes tire marks and makes them easier to remove
- Equipment can be cleaned with water
- Can be applied to fresh, new, or existing concrete
- Low sheen enhances the appearance of concrete surface
- Compatible with SpecChem SpecTilt bond breakers for tiltup projects
- Cures, seals, hardens, dustproofs and prevents efflorescence
- Promotes bonding of secondary toppings
- Controls hairline crack
- One application, economical, water clean up

Usage

- Commercial/Industrial concrete floors
- Interior/Exterior
- Fresh, new or existing concrete

Packaging

- 5 gallon drum (18.93 L)
- 55 gallon (208.2 L)

Standards

- Tested per CDPH Standard Method V1.2 and is in compliance with all LEED V.4 requirements
- Recommended for ACI 302. Class 1 through 5 concrete floors, and class 9 super flat floor

- USDA accepted

Typical Properties

Active Ingredients:	100%
Type:	Proprietary blend
Flash Point:	None
Odor:	None
Color:	Clear
Dry Time:	2-4 hours
VOC:	0.0

ADVANTAGES

- Seals, dust p oofs, hardens, and cures.
- Protects against dusting, pitting, palling, efflorescence, temperature cracking in concreteInhibits freeze/thaw deterioration.
- Neutralizes excess internal alkali from concrete
- VOC Compliant and non-yellowing

COVERAGE

- Hard Troweled Finish 200-350 ft²/gal
- Broom or Float Finish 150-250 ft²/gal
- Rough Slab Finish 150-200 ft²/gal
- Old Concrete 150-250 ft²/gal

APPLICATION TYPES

Most applications are performed after the slab has been curing for a minimum of 28 days. Different specifications call for 14 days, 7 days and even 1 hour after concrete placement. The type of project, schedule and the owner determine which type of application is performed.

These application types are:

- 1 - Standard Post Seal – After the slab has been cured by another method.
- 2 - SpecChem Pre-Seal Method – This is a compatible system that includes the curing compound and is applied the same day as the slab is poured.
- 3 - Tilt-Up Application – This can be either Post or Pre-Seal method, but must consider the type of bondbreaker used.
- 4 - Remediation – This is an existing slab that the owner wants stripped and wants SpecHard applied.

PERFORMANCES

CURING- SpecHard when properly applied to fresh concrete will reduce hairline cracks. SpecHard will also act to retain moisture in the concrete necessary for the hydration reaction.

SEALING- SpecHard will cause a deep reacting chemical change in the concrete. This chemical reaction will seal the pores of the concrete for the remainder of its life.

HARDENING- SpecHard causes the concrete to consolidate creating a harder denser surface. This surface will have increased abrasion resistance and toughness.

DUSTPROOFING- SpecHard's chemical reaction with the concrete will prevent the dusting of concrete.

BONDING- SpecHard treated concrete prevents surface concrete salts thus providing great bonding for paints, caulking adhesives, and floor coverings. SpecHard is compatible with all types of surface coatings.

COMPANION PRODUCTS

E-Cure-

A guaranteed compatible cure that requires no stripping prior to the use of SpecHard.

SpecGuard-

A great option to add additional shine and stain resistance to your SpecHard floor.

Orange Peel-

Perfect for remediation application where SpecHard is used.

SPECIFICATION

- Recommended for ACI 302
- Class 1 through 4 concrete floors, and class 9 super flat floors
- USDA accepted
- Can contribute to LEED points
- VOC and OTC compliant
- Typical Properties
- Active Ingredients: 100%
- Type: Proprietary blend
- Flash Point: None
- Odor: None
- Color: Clear
- Dry Time: 2-4 hours
- VOC: 0.0
